INSTRUCTIONS

How to print this digital file

A5 size

1. Open the PDFs in Adobe Reader. It won't work in any other program.
2. Load up your printer with A5 paper. Just cut some A4 paper in half if you don't have any A5 paper.
3. **The following settings will look different for every printer.**
4. Go to File - Print. Click on the Properties tab, then click on the Printing Shortcuts tab and choose A5 size under Paper Sizes. If you don't have that size available, click on the Features tab and choose A5 size. You might need to click on "more" to find A5 size.
5. Click OK. Back on the print settings window under "Size" choose "actual size" and that should produce a perfect print. If you notice the artwork gets cut off after printing, choose "fit" next time you print. Do not choose "shrink" as it will shrink the image and make it lose its quality. Make sure the "custom scale" is at 100% unless you want to print the image smaller than 100%.
6. Print out on card stock. You can print at home or at a copy shop.

Letter size (North America)

1. Open the PDF file in Adobe Reader.
2. Load up your printer with 8.5x 11" paper.
3. **The following settings will look different for every printer.**
4. Go to File - Print. Click on the Properties tab, then click on the Printing Shortcuts tab and choose Letter size under Paper Sizes.
5. Click OK. Back on the print settings window under "Size" choose "actual size" or "fit". Do not choose "shrink" as it will shrink the image and make it lose its quality. Make sure the "custom scale" is at 100% unless you want to print the image smaller than 100%.
6. Print out on card stock. You can print at home or at a copy shop.
7. If necessary, cut out the artwork along the solid lines with a craft knife or scissors.

A4 size (Europe/International)

1. Open the PDF file in Adobe Reader.
2. Load up your printer with A4 paper.
3. **The following settings will look different for every printer.**
4. Go to File - Print. Click on the Properties tab, then click on the Printing Shortcuts tab and choose A4 size under Paper Sizes.
5. Click OK. Back on the print settings window under "Size" choose "actual size" or "fit" Do not choose "shrink" as it will shrink the image and make it lose its quality. Make sure the "custom scale" is at 100% unless you want to print the image smaller than 100%.
6. Print out on card stock. You can print at home or at a copy shop.
7. If necessary, cut out the artwork along the solid lines with a craft knife or scissors.
